

INST327 – Assignment 2

NOTE: There is an extra credit opportunity in Question 2.

Be sure you complete both questions.

Please consult the rubric and instruction sheets before starting the assignment. Usage of some keywords or structures (IF, IFNULL(), etc.) that are not allowed will result in point deductions. This is to test you on what we have taught you even though these keywords and structures may seem like an easier solution. You will be allowed to use these keywords and structures in later assignments.

Q. 1) **JOINS and UNION** (50 points)

You must make use of the UNION keyword for this question. Write a query that replicates the result set shown below, matching all data and format aspects, including column headers.
