

INST327 Assignment 4 C*UD

Please use the `ischool_v2` database for this assignment.

Be sure you complete all three questions.

Please consult the rubric and instruction sheets before starting the assignment. Usage of some keywords or structures that are not allowed will result in point deductions. This is to test you on what we have covered so far, even though some keywords and structures may seem like an easier or more efficient solution.

Q1) CREATE AND INSERT (40 points)

The tables created in this question will be used in all questions in this assignment.

1. First, create copies of three tables: **people**, **addresses**, and **person_addresses** as **people_copy**, **addresses_copy**, and **person_addresses_copy**, respectively. Then insert all data from the original tables into the copies. When creating the tables, preserve column attributes and indexes (this can be done with the LIKE keyword).

To allow for repeated clean executions of your script, precede the statements with DROP TABLE statements. To ensure that the script will run cleanly even when tables have not yet been created, use DROP TABLE IF EXISTS .

Include the code used to create **people_copy**, **addresses_copy**, and **person_addresses_copy** in your answer file. After making these copies, you will insert new data into these tables.

2. Insert a new person's information into the **people_copy** table with these values for each specified column:

lname: Soprano

department: BMGT

fname: Tony

title: Capo

email: tsoprano@mobmail.com

start_date: 1999-01-10

college: Robert H. Smith School of Business

3. Insert a new address's information into the **addresses_copy** table with these values for each specified column:

address_id: 146

zipcode: 07004

street: 633 Stag Trail Road

country: United States

city: North Caldwell

main_phone: 917-555-0157

state: NJ

4. Insert a new person address into the **person_addresses_copy** table with these values for each specified column:

person_id: The person_id of Tony Soprano

address_id: 146

Do not post on Chegg! Chegg posts of this assignment are a violation of course policy

- Write three SELECT queries to check that the new information has been successfully added. The **people_copy** table should return **141** rows, **addresses_copy** should return **146** rows, and **person_addresses_copy** should return **108** rows.

Q2) UPDATE (40 points)

- The FBI is onto Tony, and he is forced to flee the country. Write update statement(s) to change Tony's address to Colombia.

HINT: You may need to turn off the SQL_SAFE_UPDATES system variable as we did in class.

- Then, write a SELECT query that returns details of Tony's new address information and sort as shown in the picture below.

	person_id	address_id	full_name	street	location_name	main_phone
▶	132466080	33	Jackson Wang	4 Bellgrove Street	Urban, China	743-555-0402
	132466059	19	Zhi Chen	29821 Manitowish Trail	Fuqing, China	830-555-6586
	132466128	6	Tony Soprano	35614 5th Center	Suba, Colombia	812-555-4512
	132466075	6	Douglas Duffy	35614 5th Center	Suba, Colombia	812-555-4512
	132465991	27	Zoe Martina	0 Briar Crest Trail	Newport, Curacao	840-555-6486
	132466044	35	Omar Cunio	7380 Grayhawk Street	Aswan, Egypt	870-555-2514
	132466014	11	Aiko Ito	34 Vernon Avenue	Haraida, Japan	877-555-7471
	132466087	107	Bernelle Yurchenko	08806 Debs Pass	Annapolis, United States	763-555-0137
	132466085	60	Cameron Nixon	7 Pearson Drive	Hyattsville, United States	734-555-0035
	132466073	36	Dix Harse	68 Westend Circle	Annapolis, United States	763-555-8610
	132466094	53	Wood Dobbyn	77125 Carpenter Terr...	Buffalo, United States	716-555-7607
	132466021	85	Ninetta Chesshire	018 Buhler Crossing	Arlington, United States	703-555-5204
	132466065	50	Yuan Chen	6240 7th Hill	Bronx, United States	718-555-1388
	132466000	71	Noni Beatey	420 Jay Hill	Newport News, United S...	757-555-3471
	132466057	93	Berri Alldred	83751 Moulton Avenue	Hyattsville, United States	734-555-9679
	132466086	105	Jules Address	26101 Mallard Crossing	Hyattsville, United States	810-555-0220
	132466082	103	Almeria Abilowitz	91 Buena Vista Trail	Hyattsville, United States	734-555-6187

17 rows returned.

Q3) DELETE (20 points)

Tony has mysteriously disappeared. In light of this, the university has decided to delete all records related to Tony.

- To handle this situation, write **DELETE** queries that remove Tony's personal information, including his address information.

NOTE: Do not leave any orphan rows.

Do not post on Chegg! Chegg posts of this assignment are a violation of course policy

2. Run the **SELECT** query you wrote for question 2 to make sure that the records have been properly deleted.

	person_id	address_id	full_name	street	location_name	main_phone
▶	132466080	33	Jackson Wang	4 Bellgrove Street	Urban, China	743-555-0402
	132466059	19	Zhi Chen	29821 Manitowish Trail	Fuqing, China	830-555-6586
	132466075	6	Douglas Duffy	35614 5th Center	Suba, Colombia	812-555-4512
	132465991	27	Zoe Martina	0 Briar Crest Trail	Newport, Curacao	840-555-6486
	132466044	35	Omar Cunio	7380 Grayhawk Street	Aswan, Egypt	870-555-2514
	132466014	11	Aiko Ito	34 Vernon Avenue	Haraida, Japan	877-555-7471
	132466087	107	Bernelle Yurchenko	08806 Debs Pass	Annapolis, United States	763-555-0137
