

INST 327 - Assignment 5 - Grading Rubric Overall:

Did not follow submission instructions (per occurrence)¹

-5

Questions 1 and 2 (50 points each)²

Format	One format issue ³	-2
	Two format issues	-6
	Three or four format issues	-10
	Five or more format issues	-15
Grouping	Grouped by the wrong column, if needed	-4
	Aggregate column wrong or missing (-12 if two or more are wrong or missing)	-6
	No GROUP BY clause, if needed	-8
	No ROLLUP, if needed	-8
Conditions	No WHERE and/or HAVING clause(s), if needed	-8
Order	Row order slightly off (one or two rows affected)	-2
	Row order substantially off (three or more rows affected)	-6
	No ORDER BY clause, if needed	-12
Structure	Slight error in query structure (with no result set consequences) (each instance)	-4
	Slight error in query structure (with slight result set consequences) (each instance)	-8
	Query unnecessarily complex ⁴	-8
	Substantial error in query structure (with result set consequences) (each instance)	-20
Syntax	Missing closing semi-colon	-1
	Database not specified (must have either USE statement or DB reference with table names)	-2
	One syntax error preventing query to run; (when fixed, correct result set displayed)	-8
	Two syntax errors.	-16
	Three syntax errors.	-20
	Four or more syntax errors.	-30
Other	Other error or issue (depending on severity) (each instance)	-1 / -30

¹ Including, but not limited to, failure to follow file type and upload instructions. These points will be deducted from the overall grade for this assignment after individual questions are graded and will be applied in addition to grade reductions on individual questions.

² Points lost might add up to more than available points, in which case the answer is graded as zero.

³ Format issues include, but are not limited to: incorrect column order, incorrect column headings, missing or incorrect separating characters (commas, spaces) in concatenated strings, incorrect order among concatenated columns. The result set must look exactly like the sample output.

⁴ Including, but not limited to, unnecessary functions, unnecessary clauses, unnecessary filtering statements.
