

INST 327 – Database Design and Modeling

Assignment 7 - See Canvas for the deadline Instructions

Read the full set of instructions and make sure that you understand them all before starting working on the assignment. You may lose points if you do not follow all of these instructions.

- o Submit your assignment as a whole by the deadline stated on Canvas. Do not make partial submissions, (i.e., a subset of the answers). You may lose points for making partial submissions, even if your answers are correct.
- o **No late submissions are allowed for this assignment. If you miss the deadline without a university-sanctioned and documented excuse, you will not be able to submit the assignment.**
- o Late submissions due to technical issues with Canvas, computer crashes, power outages, etc. are not allowed for this assignment. To avoid such problems, submit your work well in advance of the deadline.
- o Submit your answers via Canvas (ELMS) using the link on the assignment page by the deadline.
- o Contact the instructors immediately if you think there is an error in any of the question, or if you need more clarification.
- o This and all remaining assignments in this course are individual-work. Please work on your answers and scripts individually without help from other students in the course and other individuals. As required by University of Maryland regulations, all cases of misconduct are reported to the Office of Student Conduct irrespective of scope and circumstances.

Posting an assignment question on Chegg or any other site outside the ELMS course site to obtain assistance from anyone other than a member of the instruction team of this course is NOT allowed. This is true for all major assignments.

The instructors, TAs, and AMPs are the best source for help while working on this assignment. Feel free to seek help from the instruction team at any time, as needed.
