

INST327 - Database Design and Modeling

Assignment 7 Questions

There is only 1 question in this assignment.

Note: Use the *ischool_v2* database for this assignment.

Question 1. (50 points) – Views

Create a view named *people_from_location_in_bsis* that displays the number of people in each city, state, country location that are in the BSIS department. Don't forget to write and test your SELECT query before using it to create the view.

Note: Once you've created the view you can easily see the results with the following code:

```
SELECT * FROM people_from_location_in_bsis;
```

Your result set should look like this, including data, sort, column headers, and all formatting aspects.

Geo_Location	Department	Number_in_Department
Address Unknown	BSIS	28
Washington, DC, United States	BSIS	16
Annapolis, MD, United States	BSIS	13
Hyattsville, MD, United States	BSIS	13
Oakland, CA, United States	BSIS	2
Wilmington, DE, United States	BSIS	2
Cowansville, QC, Canada	BSIS	1
Hot Coffee, MS, United States	BSIS	1
New Bedford, MA, United States	BSIS	1
Newport News, VA, United States	BSIS	1
Pittsburgh, PA, United States	BSIS	1
Roanoke, VA, United States	BSIS	1
Trenton, NJ, United States	BSIS	1
